At Algood Caster Innovations, we are always developing new casters and products to meet our customers' current needs and to anticipate their future needs. As a result, we have become an industry leader in new product development. We are pleased to present some of our latest casters and products. For more information about any of these, please call our Customer Service department or send us a [message](#).

Algood's Lava™ can withstand temperatures of up to 525° and is the industry leader in high temperature wheels

Lava

- 600-1,300lbs.
- Made from proprietary nylon resin
- Resistant to most chemicals
- Applications: high temperature industrial and institutional settings including bakery, paint lines, kitchens

The long lasting maintenance free wheel

RollX™

- 400-1,800 lbs.
- Resistant to almost all chemicals and liquids
- Resists chipping, cracking and degradation on almost any surface
- Applications: tool boxes, waste bins, stock trucks, demanding industrial environments

The Intelligent Braking Mechanism

iLock

- Precise eight position directional and wheel lock
- Made from a proprietary, a non marking, exclusively developed thermal plastic nylon material
- Resistant to most chemicals, solvents, gases, acids, steam cleaning and does not absorb water
- Temperature range from -30F to + 250F
- Applications:

A dual spring loaded caster so quit and so smooth, you'll think you're in space

Zero Gravity

- 200-1,100 lbs.
- Pre-load capacity 200 lbs; bottom-out 1100lbs., with a sweet spot of 700lbs at 4.5" of deflection.
- Corrosion resistant bright zinc finish
- Applications: lift trucks, narrow aisle reach trucks, pallet trucks, order pickers and walkie trucks.
